### THE EASTERN SHORE

No dashing surf or booming tide,  
Pounds on the Eastern Shore,  
Yet big ships glide on every side,  
Far from the ocean's roar.  
For the land lies low on the Eastern Sho'  
Where the tides of the Chesapeake flow.

The dogwood blooms at the salt sea's edge,  
Along its creeks and bays,  
No other strand in all the land  
Has such splendid water ways.  
For the land lies low on the Eastern Sho'  
Where the tides of the Chesapeake flow.

The pine trees mingle with the seas,  
The wheat fields with the woods.  
Strange to relate no other state  
Is blessed with so many foods.  
For the land lies low on the Eastern Sho'  
Where the tides of the Chesapeake flow.

The stranger's greeted with a smile  
And welcomed with a nod,  
For the folks all know the Eastern Sho'  
Is direct from the hands of God.  
For the land lies low on the Eastern Sho'  
Where the tides of the Chesapeake flow.

## *A Statement of Policy*

The members of the Maryland Nurserymen's Association adopted the following to be their policy in the sale of all plants:

**"AS THE LIFE OF TREES AND PLANTS AFTER THEY LEAVE OUR HANDS AND CARE CANNOT BE GUARANTEED; ALL CLAIMS FOR REPLACEMENTS WILL BE ADJUSTED; BASED ON FULL INFORMATION AND FAIRNESS TO BOTH PARTIES CONCERNED."**

No adjustment of any kind on any plant will be made on any account not paid within thirty days.

Cultivation and watering is necessary the first summer after planting.

The prices are for plants dug and delivered in this vicinity. An additional charge is made for planting service. We ask your cooperation in consolidating deliveries during the present emergency.

## A GARDEN IS FOR PLEASURE

Gardening has long been a tradition of the leisured and quiet life on the colonial estates of the Eastern Shore of Maryland's Chesapeake Bay region. Our organization has been developed with the one thought in mind, of helping our clientele who have located here increase the Eastern Shore's fame as a gardened spot.

In this little booklet you will find listed plants that we know are particularly suited to the soils and climate of the Eastern Shore. All of the plants included with the exception of the fruit trees are grown and tested in our nurseries.

## *Planning Your Garden*

The modern nursery client is usually interested in buying plants to give his home a setting or for the creation of an outdoor picture. It is the effect produced that counts. To create the garden picture, it should be planned. Planning can be done by simple staking on the grounds, by rough sketches, or by complete landscape plans. Any one of these methods can be used by us to suit your needs. The color, the texture, the growth and character of the plant materials used are considered in relation to their surroundings to produce the complete picture. A charge is made for detailed landscape plans.

# Perennials

A good perennial border is often the most attractive and satisfying feature of the garden. Use standard varieties planted in wide border against a good background. Have three zones of heights; bulky plants in the back, medium heavy and spikey plants in the middle ground and the dwarf varieties in front. Use color combinations and not color schemes.

We have developed a nice collection of over ninety varieties of one and two-year old perennials. Let us make a perennial garden for you.

## Lawns

To get the best lawns possible on the Eastern Shore, it is necessary to prepare the soil properly. It is advisable to cultivate thoroughly and loosen the surface several inches deep. Nearly all soils are sadly deficient in humus, so that it is desirable to add up to an inch to the whole surface of the lawn area. This should be well mixed in. Any good lawn fertilizer should be added; lime should be added only after testing your soil. Fall is the best time for seeding lawns.

We offer the grass seed mixture found by continued testing to be the best for this section.
